Series Statement

Series Name: Uniform Crime Reporting Program Data Series

Series Information: Since 1930, the Federal Bureau of Investigation (FBI) has compiled the Uniform Crime Reports (UCR) to serve as periodic nationwide assessments of reported crimes not available elsewhere in the criminal justice system. With the 1977 data, the title was expanded to Uniform Crime Reporting Program Data. Each year, participating law enforcement agencies contribute reports to the FBI either directly or through their state reporting programs. ICPSR archives the UCR data as five separate components: (1) summary data, (2) county-level data, (3) incident-level data (National Incident-Based Reporting System [NIBRS]), (4) hate crime data, and (5) various, mostly nonrecurring, data collections. Summary data are reported in four types of files: (a) Offenses Known and Clearances by Arrest, (b) Property Stolen and Recovered, (c) Supplementary Homicide Reports (SHR), and (d) Police Employee (LEOKA) Data (Law Enforcement Officers Killed or Assaulted). The county-level data provide counts of arrests and offenses aggregated to the county level. County populations are also reported. In the late 1970s, new ways to look at crime were studied. The UCR program was subsequently expanded to capture incident-level data with the implementation of the National Incident-Based Reporting System. The NIBRS data focus on various aspects of a crime incident. The gathering of hate crime data by the UCR program was begun in 1990. Hate crimes are defined as crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity. In September 1994, disabilities, both physical and mental, were added to the list. The fifth component of ICPSR's UCR holdings is comprised of various collections, many of which are nonrecurring and prepared by individual researchers. These collections go beyond the scope of the standard UCR collections provided by the FBI, either by including data for a range of years or by focusing on other aspects of analysis.

Abstract

The UNIFORM CRIME REPORTING PROGRAM DATA: SUPPLEMENTARY HOMICIDE REPORTS, 2018 (SHR) provide detailed information on criminal homicides reported to the police. These homicides consist of murders; non-negligent killings also called non-negligent manslaughter; and justifiable homicides. UCR Program contributors compile and submit their crime data by one of two means: either directly to the FBI or through their State UCR Programs. State UCR programs frequently impose mandatory reporting requirements which have been effective in increasing both the number of reporting agencies as well as the number and accuracy of each participating agency's reports. Each agency may be identified by its numeric state code, alpha-numeric agency ("ORI") code, jurisdiction population, and population group. In addition, each homicide incident is identified by month of occurrence and situation type, allowing flexibility in creating aggregations and subsets.

Summary Data Description

Time Period: 2018

Date(s) of Collection: 2018

Country: United States

Geographic Coverage: US states, counties, cities

Unit of Analysis: Homicide incidents

Universe: Homicide incidents reported by law enforcement agencies in the United States

Kind of Data: Aggregate Data

Notes

The unit of analysis in this dataset is the homicide "incident" as defined by the Uniform Crime Reporting (UCR) Program. Thus, information on the victim(s), the offender(s), the relationship between these individuals, the weapons used, and the circumstances surrounding the homicide are provided by incident. Up to eleven offenders can be involved in an incident. The Uniform Crime Reporting Program (UCR) is a data collection effort designed to provide an overall view of crime in the United States. Data for the UCR have been gathered by the Federal Bureau of Investigation (FBI) since 1930. The data are compiled from law enforcement agencies on a monthly basis. UCR data housed at the Inter-university Consortium for Political and Social Research (ICPSR) include: OFFENSES KNOWN AND CLEARANCES BY ARREST (also known as RETURN A), PROPERTY STOLEN AND RECOVERED (also known as SUPPLEMENT TO RETURN A), SUPPLEMENTARY HOMICIDE REPORTS (SHR), and POLICE EMPLOYEE (LEOKA) DATA. The UCR data for 1975-1997 are archived under ICPSR study number 9028. Starting with the 1998 UCR data each of the main data files comprising the UCR has been given its own ICPSR study number. New study numbers will be issued each year for OFFENSES KNOWN AND CLEARANCES BY ARREST, PROPERTY STOLEN AND RECOVERED, SUPPLEMENTAL HOMICIDE REPORTS, and POLICE EMPLOYEE (LEOKA) DATA. Each UCR data file, regardless of year or study number, has its own documentation specific to it.

Methodology and Processing

Data Collection Methodology

Time Method: Cross-sectional

Data Collector: United States Department of Justice. Federal Bureau of Investigation

Frequency of Data Collection: Monthly

Mode of Data Collection: Mail-in Forms

Characteristics of Data Collection Situation:

UCR data are submitted voluntarily by city, county, and state law enforcement agencies. Some agencies receive forms directly from the FBI and return them directly to the FBI. Many others receive forms from state collecting programs and return these forms to those programs. The state programs, in turn, forward the reports to the FBI. Reports are sent out and collected on a monthly basis.

Law enforcement agencies that reported criminal homicides on the basic UCR Return A form - from which come the Offenses Known and Clearances by Arrest data files: ICPSR 9028 (Parts 1, 5, 9,...97), ICPSR 2904 (1998), ICSPR 3162 (1999), ICPSR 3451 (2000), ICPSR 3723 (2001), ICPSR 4008 (2002), and ICPSR 4124 (2003) - were requested but not required to submit a Supplementary

Homicide Report (SHR) for each month in which homicides became known. The SHR was not submitted by agencies for months in which no homicides were reported to police.

In contrast to data collection procedures for the UCR Return A forms where one offense is counted for each victim of a personal crime (i.e., criminal homicide, rape, and assault), the SHR's unit of analysis is the incident or "homicide situation" which may involve more than one victim.

The SHR data records up to 11 victims and 11 offenders. The relationship of the victim to the offender is recorded in the offender sequence of variables. Data users should be aware that victim-offender relationships are not always completely included with the SHR data.

Variable V18 (SITUATION) contains six categories for homicides:

- · single victim/single offender
- single victim/unknown offender(s)
- · single victim/multiple offenders
- · multiple victims/single offender
- multiple victims/unknown offender(s)
- multiple victims/multiple offenders

In situations of multiple victims and a single offender the relationship of the victim to the offender is that of victim 1 to the offender. The relationships of the other victims to the offender are not contained in the data.

Similarly, in situations of multiple victims and multiple offenders the relationship variables record victim 1's relationship to each of the offenders. The data file does not contain information on each victim's relationship to each offender.

Control Operations:

Once received, the FBI checks the agencies' reports for completeness and arithmetical accuracy. If an unusual fluctuation is detected in an agency's crime count, the FBI compares those counts with counts from previous reports or compares the frequencies to those of agencies similar to the agency in question. When necessary, law enforcement agencies are contacted to correct or explain the figures.

Data Use Statement:

Citation Requirement: Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications.

Deposit Requirement: To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.

Extent of Processing Checks: The data collection was processed according to standard ICPSR processing procedures. No consistency checks were performed.

Missing Data: Starting with the 1998 data, ICPSR did not recode blanks or system missing data to standardized values. Users should note that blanks and missing data may have a substantive meaning under the FBI coding scheme. Users should refer to the documentation for explanation of individual variables.

Uniform Crime Reporting Program Data: Supplementary Homicide Reports, United States, 2018

Variable Description

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
